**GOVERNMENT FIRST GRADE COLLEGE FOR WOMEN
JAMKHANDI**

BEST PRACTICE - 1

Title of the Practice: “BE A HELPING HAND”

Objectives of the Practice:

- 1. To build a student-friendly campus.**
- 2. To inspire students to participate in charitable activities.**

The Context: The students of the college especially outgoing students (Final year completed students) are having the habit of contributing/donating materials to the college willingly. The materials like Books, furniture, Vessels, etc, towards their love and affection for the college. Also, the parents of our college students provide one-time breakfast/meals sponsorship during NSS camps.

The Practice: The materials contributed by our institution's students are utilized efficiently in college. Competitive and other books donated by students are used by many students, motivating other students to join in the charity practice and strengthening the Helping-hands. During the COVID-19 Pandemic, our college Rangers prepared masks with their own time and money and distributed them across Jamkhandi. In addition, Ranger students supported COVID-19 guidelines by providing SMS services (Sanitizing, Masking, and Social Distancing).

Evidence of Success: This practice is much successful because every year students contribute materials in their class groups' names. The books contributed by the students are kept in the respective departments and the department library is maintained. This is very useful for the new coming students. This practice is also continued after their studies many students have become information hubs in their respective places, they provide information like government programs, services, etc to the needy people. Students firmly adhere to this 'Helping hand' practice.

Problems Encountered and Resources Required: No such problems are faced in this practice.

Title of the Practice: “USE OF SOCIAL NETWORK”

Objectives of the Practice

1. **To connect a college with society.**
2. **To promote the E-environment campus.**

The Context: The most significant benefit of social media is its ability to connect people. It offers the capacity to link several users from various locations at the same time. Information and expertise may be communicated and transmitted around the globe due to social media and its connectivity. For the past ten years, the Government First Grade College for Women in Jamkhandi has promoted the use of social media and is particularly active on platforms such as Facebook, Telegram, YouTube, and WhatsApp.

The Practice: For the past 10 years, the college has been very active on social media platforms such as Facebook, Telegram, YouTube, WhatsApp, and others. Using social media allows students to stay connected with teachers and society. This practice has become a boon to maintaining a mentor-mentee relationship, as teachers and students receive quick responses from each other for many academic doubts, and it is also very beneficial in sharing information about job vacancies, competitive exams, and so on. In addition, our students created a short film on COVID-19 safety measures to raise awareness in society, which has improved the institution's popularity.

Evidence of Success: This practice is successful because college activities reach out to the grass-root community/society, resulting in a significant rise in the number of students admitted each year, and also much information is circulated easily among students.

Problems Encountered and Resources Required: Every student must st have a mobile phone and internet connectivity to use this service.
