

#### **D. Green Campus Initiatives:**

The College is located at the outskirts of the City with 3.10 acres of land. In order to create a green canopy college, students and faculty members of the College have planted nearly 100 saplings. The variety includes, Coconut, Tamarind, Drumstick, Banyan, Australian Oak, Pongamia and few medicinal plants like Amla, Amrutha balli, Aloevera, etc.

Every week and fortnightly, the NSS Volunteers, faculty members and 'D' group employees were watering and weeding of the plants. Regular watch and guard of saplings have been ensured. This practice is being implemented from 2010-11 onwards to till date.

One of the faculty members of this College, Smt. C.M. Rekhamani, on the occasion of her children's birthday, planted four saplings in College premises and this practice has boosted the morale and sensitivity towards ecology and environment among the pupils and few of them have followed the same. The planted saplings have grown and on an average their height would be 4-5 ft.
